SKILLS

- **Languages:** Python, C++, Java, SQL
- **Machine Learning & AI:** Data Preprocessing, Supervised & Unsupervised Learning, Computer Vision, CNN
- **Frameworks & Tools:** Scikit-learn, Pandas, NumPy, Git, GitHub
- **Generative AI:** Retrieval-Augmented Generation (RAG), LangChain, Large Language Models (LLMs)
- **Core Concepts:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks
- **Soft Skills:** Problem-Solving, Team Collaboration, Adaptability

PROJECTS

Movie Recommendation System | [GitHub](#)

Sep 2025 – Nov 2025

- Developed a Movie Recommendation System using Python and Scikit-learn delivering personalized suggestions based on user preferences and viewing patterns.
- Implemented collaborative and content-based filtering techniques using similarity-based ML algorithms to improve recommendation accuracy.
- Built an interactive Streamlit dashboard for movie exploration, integrating real-time movie data APIs to enhance user experience.

Tech Stack: Python, Scikit-learn, Pandas, Streamlit

GenAI Document Studio | [GitHub](#)

May 2026 – Jun 2026

- Developed an AI-powered Document Intelligence Platform using Python, Streamlit, and LangChain enabling natural-language queries over PDF, TXT, and Markdown files.
- Built a RAG pipeline with semantic search, multiple chunking strategies (Recursive, Sentence, Paragraph, Fixed-size, Sliding Window), and configurable parameters to improve retrieval accuracy.
- Integrated multiple LLMs via OpenRouter (GPT-4o Mini, GPT-4o, GPT-4.1 Mini), implemented LangSmith for tracing/debugging, and deployed on Streamlit Community Cloud.

Tech Stack: Python, Streamlit, LangChain, OpenRouter, LangSmith, FAISS, PyPDF, RAG

Potato Disease Classification | [GitHub](#)

Jun 2026 – Jul 2026

- Developed a **Potato Disease Classification System** using **Python, TensorFlow, and CNN** to automatically identify **Healthy, Early Blight, and Late Blight** from leaf images with **99% model accuracy**.
- Built a **Flask-based web application** enabling users to upload potato leaf images and receive real-time disease predictions with confidence scores
- Implemented image preprocessing, CNN model training, evaluation, and deployment using deep learning techniques to support automated plant disease detection..

Tech Stack: Python, TensorFlow, Keras, CNN, Flask, OpenCV, NumPy, HTML, CSS, JavaScript

TRAINING

Data Structures and Algorithms | [Certificate](#) | Lovely Professional University (LPU)

Jun 2025 – Jul 2025

- Gained hands-on experience solving DSA problems in Java, including arrays, linked lists, stacks, queues, trees, graphs, and sorting algorithms.
- Learned to optimize time and space complexity; completed multiple coding challenges and mini projects to strengthen logical thinking.

CERTIFICATES

- | | |
|---|----------|
| • Privacy and Security in Online Social Media NPTEL | Dec 2025 |
| • Build-a-Thon Hackathon Board Infinity | Feb 2024 |
| • The Bits and Bytes of Computer Networking Coursera | Sep 2024 |
| • Introduction to Hardware and Operating Systems Coursera | Sep 2024 |

ACHIEVEMENT

- Solved 350+ Data Structures and Algorithms problems on LeetCode, GeeksforGeeks, and NeoColab, improving algorithmic and analytical skills (since Jan 2024).

EDUCATION

Lovely Professional University, Phagwara, Punjab

Since Aug 2023

Bachelor of Technology – Computer Science and Engineering | CGPA: 8.07

SJS Public School, Raebareli, Uttar Pradesh

Apr 2020 – Mar 2021

Intermediate – 78.20%
